

nbs Launches New Internet Banking

One of nbs' key goals is to supercharge the adoption of digital banking products by its customers and Samoa. So we've taken on board the feedback from the recent customer survey and have invested in the latest Oracle internet banking software Oracle Banking Digital eXperience (OBDX) – the first bank to use OBDX in the South Pacific Islands!

Not only can customers do all the internet banking functions they were able to do on the old site, but it is now much easier and quicker to navigate around the new internet banking site.

Whether you want to pay your invoices, transfer money to relatives, check your account balances, or look up your loan details – you'll find it easier to find your way around the new site to get what you want. There are some new additional features such as key suppliers sending your invoices direct to your personal internet banking site, making it easier to review the invoices and pay in a timely manner.

The new Internet Banking platform will be shortly followed by an app allowing customers to access nbs' Internet Banking via their smart phones with a single click.

Customers are being encouraged to check out the new internet banking site and can do so by clicking on the "Internet Banking" tab on the nbs website. This will take them to a new login page as shown.
